

Legislative Appropriations Request
For Fiscal Years 2018 and 2019

Submitted to the
Office of the Governor, Budget Division, and the
Legislative Budget Board

by

August 5, 2016

**UNIVERSITY of NORTH TEXAS
HEALTH SCIENCE CENTER at FORT WORTH
LEGISLATIVE APPROPRIATIONS REQUEST for FISCAL YEARS 2018-19**

TABLE OF CONTENTS

Schedules Not Included	1
Administrator’s Statement	3-7
Organizational Chart	8
Biennial Budget Overview Schedule	9-10
Summaries of Request	11-35
Strategy Request	36-94
Program-Level Request	95
Rider Revisions and Additions Request	96-99
Exceptional Item Request	100-103
Historically Underutilized Business	104-105
Estimated Funds Outside the GAA	106
10% Biennial Base Reduction Options Schedule	107-116
<u>HIGHER EDUCATION SUPPORTING SCHEDULES:</u>	
Schedule 1A: Other Educational and General Income	117-119
Schedule 2: Grand Total Educational, General and Other Funds	120-121
Schedule 3A: Staff Group Insurance Data Elements	122-124
Schedule 4: Computation of OASI	125
Schedule 5: Proportionality and ORP Differential	126
Schedule 6: Constitutional Capital Funding	127
Schedule 7: Personnel	128-130

UNIVERSITY of NORTH TEXAS
HEALTH SCIENCE CENTER *at* FORT WORTH
LEGISLATIVE APPROPRIATIONS REQUEST for FISCAL YEARS 2018-19

Schedule 8B:	Tuition Revenue Bond Issuance History	131
Schedule 8D:	Tuition Revenue Bonds Request by Project	132
Schedule 9:	Special Item Information	133-146

Schedules Not Included

Agency Code: 763	Agency Name: UNT Health Science Center	Prepared By: Charles Marris	Date: August 5, 2016	Request Level: Baseline
----------------------------	--	---------------------------------------	--------------------------------	-----------------------------------

For the schedules identified below, the UNT Health Science Center either has no information to report or the schedule is not applicable. Accordingly, these schedules have been excluded from the UNT Health Science Center Legislative Appropriations Request for the 2018-19 biennium.

Number	Name
Schedule 3.C.	Rider Appropriations and Unexpended Balances Request
Schedule 5A-5E	Capital Budget and Supporting Schedules
Part 6.B.	Current Biennium One-Time Expenditure
Part 6.C.	Federal Funds Supporting Schedule
Part 6.D.	Federal Funds Tracking Schedule
Part 6.E.	Estimated Revenue Collections Support Schedule
Part 6.F.	Advisory Committee Supporting Schedule
Part 6.F.a.	Advisory Committee Supporting Schedule ~ Part A
Part 6.F.b.	Advisory Committee Supporting Schedule ~ Part B
Part 6.G.	Homeland Security Funding Schedule
Part 6.J.	Summary of Behavioral Health Funding
Part 8	Summary of Requests for Capital Project Financing
Schedule 1B	Health-related Institutions Patient Income
Schedule 3B	Staff Group Insurance Data Elements (UT/A&M)
Schedule 3D	Staff Group Insurance Data Elements – Supplemental (UTMB, UTHSCH, TTUHSC and Texas Forest Service)
Schedule 8A	Proposed TRB Projects Schedule
Schedule 8C	Revenue Capacity for Tuition Revenue Bond Projects

763 University of North Texas Health Science Center at Fort Worth

INSTITUTIONAL VISION

The University of North Texas Health Science Center (UNTHSC) is organized around the following institutional principles:

- Our purpose: Transform lives in order to improve the lives of others.
- Our vision: Be an extraordinary team, committed to excellence, unafraid to challenge conventional wisdom.
- Our mission: Create solutions for a healthier community.
- Our values: Serve Others First, Integrity, Collaboration, Respect, Be Visionary.

Interprofessional Education

Our 33-acre campus in the heart of Fort Worth's Cultural District consists of five schools and colleges:

- Texas College of Osteopathic Medicine
- Graduate School of Biomedical Sciences
- School of Public Health
- School of Health Professions
- UNT System College of Pharmacy

UNTHSC is committed to developing collaborative, practice-ready health professionals by emphasizing team-oriented, evidence-based best practices, quality-improvement approaches and informatics across all five of its schools and colleges. We believe our students will be better disposed to cooperative efforts as practitioners having experienced opportunities to learn about, from and with students from other professions. We are committed to integrating collaborative practice competencies and interprofessional education opportunities beginning with the initial year of our students' health care education and reinforcing these competencies across all years of their education and training. Students who experience interprofessional discipline are better prepared to contribute to a culture of patient safety and improved patient outcomes.

With an enrollment of approximately 2,475 students in Fall 2016, our academic strength continues to grow in national prominence. As noted by U.S. News & World Report, UNTHSC is ranked among the nation's top medical schools for primary care for 15 consecutive years. Among the magazine's ranked programs, the Texas College of Osteopathic Medicine is first in Texas and second nationally in the percentage of graduates entering primary care fields.

Our newest school, the UNT System College of Pharmacy, recently enrolled its fourth cohort of students, putting it at full capacity for the first time. It is the first pharmacy school in North Texas and the first in the state to be located on an academic health science center campus. It will graduate its first class of students in 2017, and they will be expected to provide patient care, including medication management, and become an important part of the health care teams that take care of Texans.

Discovery/Research

Since 2006, we have partnered with the non-profit technology incubator TECH Fort Worth to bring new technologies to the market. Firms get a boost from our Accelerator Lab Program and our Executives-in-Residence, who act as mentors and offer advice from their years of experience in the pharmaceutical industry. One recent success story is ZS Pharma, a company that started in our Accelerator Lab. Last year, the British drug maker AstraZeneca bought it for \$2.7 billion in cash. We continue to achieve the milestones for our 1115 Healthcare Transformation Waiver programs and have the necessary infrastructure in place to ensure the future success of our Delivery System Reform Incentive Payment (DSRIP) projects. We remain committed to improve patient care efforts and innovation through participation in the RHP 10 Learning Collaborative.

Health Care

We specialize in primary care and prevention, healthy aging, and applied genetics.

Primary Care and Prevention

Among all Texas medical schools, we have the highest percentage of medical students entering primary care (66 percent) and the second-highest percentage among ranked medical schools in the country. Our Rural Osteopathic Medical Education of Texas (ROME) offers innovative medical education programs that prepare students for life and medical practice in rural environments. Our students train in more than 40 clinical sites across the state, from Dalhart in the northwest corner of the Panhandle to LaFeria on the border in the Rio Grande Valley – and dozens of sites in between.

The Institute for Patient Safety and Preventable Harm was newly funded by the 84th Legislature with the purpose to improve the quality and safety of health care in our region and throughout the State. To date, the Institute has hosted two national-level Patient Safety Summits attended by hundreds of health care providers, leaders, and patient advocates and is in the process of implementing public-private partnerships, one of which is focused on improving quality and safety for cancer patients.

Our Pediatric Mobile Clinic is an innovative solution for bringing much-needed primary care services to kids in under-served areas of Tarrant County. We bring an experienced team of bilingual UNTHSC clinical professionals to schools, community centers, churches, and community organizations throughout Fort Worth, helping families overcome barriers to health care access. Tarrant County has 75,000 uninsured children. Since 2014, we have made more than 7,800 medical, health education and case management visits with our mobile clinic.

Our medical and physician assistant students are among the first in the nation to experience clinical training through multidisciplinary rotations centered on mobile integrated health care. This integrated approach to health care delivery ensures patients who are in non-hospital settings receive the right resource at the right time, preventing unnecessary emergency department visits and readmissions. We partner with Medstar Mobile Healthcare and Evolution Health to deliver high-quality patient care at a lower cost.

In recent years, there has been a growing awareness that many medical problems associated with music and performing arts can be prevented. The Texas Center for Performing Arts Health is a unique partnership between the Texas College of Osteopathic Medicine and the University of North Texas College of Music that combines expertise from schools of medicine and music to make performing arts safer and artists healthier.

Healthy Aging

We have teamed up with JPS Health Network, Texas Christian University and the United Way to transform geriatric care in North Texas by improving medical training and health care delivery for our region's rapidly growing population of older residents. We were the only site in Texas selected for a federal grant from the Department of Health and Human Services to improve health care for older adults. The goals of the Tarrant County project – called WE HAIL, or Workforce Enhancement Healthy Aging and Independent Living – are to increase the number of health care providers trained to meet the needs of older adults and to integrate geriatric training into academic programs for doctors, nurses, pharmacists, physical therapists and other health care professionals.

Our Institute for Healthy Aging integrates state-of-the-art clinical care, cutting-edge research, innovative education and training, and extensive community engagement to create solutions for a new era of enduring quality of life. We are a statewide leader in both aging and Alzheimer's research, making significant advances in prevention, treatment and care. One of our most innovative programs, known as HABLE, or Health and Aging Brain among Latino Elders, examines how factors such as diabetes, physical conditions and lifestyle contribute to cognitive problems among Mexican-American seniors.

763 University of North Texas Health Science Center at Fort Worth

We are also a participant in the Texas Alzheimer's Research and Care Consortium (TARCC), a collaboration among seven of the state's leading medical research institutions to improve early diagnosis, treatment, and prevention of Alzheimer's disease by collaborating on state-funded Alzheimer's research and contributing genetic and blood biomarker data to a shared Texas Alzheimer's DataBank.

Applied Genetics

The Center for Human Identification is dedicated to applying genetic analysis (i.e., forensic DNA typing) to assist in solving crimes, identifying missing persons, and combatting human trafficking. Its Missing Persons lab is the only one in the nation set at an academic center that is approved to upload genetic data for unidentified remains to the FBI's Combined DNA Index System, a criminal justice database and software better known as CODIS. We are CODIS' largest contributor of genetic information on unidentified remains.

Since 2003, the Health Science Center has processed more than 5,200 human remains and made more than 1,975 identifications. In addition, our team has analyzed more than 14,400 family reference samples, representing more than 8,000 missing persons cases.

The Texas Missing Persons and Human Identification Program was newly funded by the 84th Legislature to supplement efforts in identifying bodies near the Texas border. Furthermore, this program supports border agencies with outreach, education, and assistance to ensure thorough analyses and investigations.

Our team of forensic experts assists law enforcement agencies throughout Texas. Agencies from across the nation seek out our expertise in hopes of using DNA technologies to identify the dead. Additionally, we have managed NamUs –the National Missing and Unidentified Persons System -- for the US Department of Justice since 2011. The NamUs database is a national clearinghouse for missing persons cases, unidentified victims, unidentified living individuals and unclaimed bodies. This free online system can be queried by medical examiners, coroners, law enforcement officials and the public from all over the country in hopes of resolving cases.

Creating Solutions for a Healthier Community

Our mission to create solutions for a healthier community includes numerous collaborations across our region. Here are just a few examples:

- Institute for Patient Safety – a collaborative institute focused on patient safety problems and preventable medical errors through professional and community education, research and quality improvement projects. Founding members of the institute include Texas Christian University, JPS Health Network and Cook Children's Medical Center.
- Regional Medical Library – one of eight libraries nationwide in the newly grant-funded National Network of Libraries of Medicine working to improve access to authoritative health information for the 40 million Americans who live in Texas, Arkansas, Louisiana, Oklahoma and New Mexico.
- Joint Admissions Medical Program (JAMP) – aimed at helping undergraduate students from economically-disadvantaged backgrounds with accessing opportunities in health care.
- Primary Care Pathway Program – an innovative new partnership among UNTHSC, Midland College and the University of North Texas that streamlines the admissions process and medical school education so that participants can become physicians in seven years rather than the traditional eight.
- North Texas Eye Research Institute – a team of over a dozen UNTHSC scientists that work together toward developing new and effective treatments for common ocular diseases such as glaucoma, macular degeneration and diabetic retinopathy.
- Asthma 411 – a collaboration between the Health Science Center and Fort Worth ISD that allows school nurses to keep breathing-treatment equipment in their offices and use them to treat children experiences asthma attacks, a project that is reducing emergency room visits and student absences.
- Tuberculosis research – a partnership with Tarrant County Public Health and the Centers for Disease Control and Prevention focused on determining how to best reduce risk of TB in vulnerable populations. As one of 10 sites for the TB Epidemiologic Studies Consortium, the project is one of several innovative research initiatives

Administrator's Statement

763 University of North Texas Health Science Center at Fort Worth

underway at UNTHSC, which has a long history of helping the CDC and others create standardized, evidence-based practices to protect against TB.

- FitWorth – a family-focused movement centered around educating and inspiring the community in making healthier decisions by rallying employers, schools, hospitals, government officials, faith communities, non-profit organizations and retailers around local activities to halt the upward trend of obesity in our community.

FUNDING PRIORITIES FOR HEALTH-RELATED INSTITUTIONS

KEY FUNDING ISSUES:

In response to the Legislative Budget Board (LBB) instructions, we reduced our General Revenue appropriations by 4 percent, as part of the LAR submission. With formula-funding strategies, this amount would equate to \$6.1 million. A cut of this magnitude would likely require faculty and staff reductions, as well as reduced program service levels, thus jeopardizing our ability to provide an extraordinary educational experience for students. To maintain the current level of services provided, we respectfully request that any reductions be reinstated.

Per the Policy Letter, satisfying debt service requirements for bond authorizations is an exemption to the baseline request limitation. To this end, our LAR request for Tuition Revenue Bond debt service exceeds the 2016-17 amounts based on principal and interest payments for existing authorizations.

In preparation of the 10 percent General Revenue reduction schedule, we evaluated all non-formula General Revenue funding. However, due to the limited number of strategies to which we can apply our "Targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10 percent. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need. Furthermore, all non-formula strategies were impacted by the 4 percent reduction; hence, a further reduction would have additional adverse impacts on the services, advancements and outcomes of these significant programs.

The UNTHSC continues to experience a full complement of student enrollment. Thus, we support the Health Related Institutions (HRI) Formula Advisory Committee's formula funding recommendations to the 85th Legislature, which would provide additional funding for the Instruction and Operations, Research, Infrastructure, and Graduate Medical Education formulas. Exceptional Item:

Center for Genome Guided Personalized Medicine: – FY 2018 \$4,000,000 & FY 2019 \$4,000,000

Compelling evidence now shows that genetic differences affect the risk for major fatal diseases including cancer, heart disease and dementia. Genetic variation also affects an individual's response to drugs and other therapeutic interventions. Pharmacogenetics and pharmacogenomics offer great promise for improving and personalizing health care. The FDA currently recommends genetic testing prior to establishing a safe dose for over 130 drugs. Moreover, research has shown that 38% of depression patients, 50% of arthritis patients, 40% of asthma patients, and 43% of diabetic patients will not respond to initial treatment. It is estimated that in Texas alone nine million prescriptions costing \$750 million were written for metoprolol and omeprazole in 2015. However, depending on genetic makeup, some patients may metabolize drugs poorly. As a result, Texans spend hundreds of millions of dollars on drugs that may not be suitable for them.

Fortunately, with the State's recent investment in the Institute for Patient Safety and Preventable Harm, an opportunity has arisen to develop a Center for Genome Guided Personalized Medicine (CPM) that would leverage the Institute's unique expertise, as well as combine the efforts of the UNTHSC's Institutes for Molecular Medicine and Applied Genetics and the UNT System's College of Pharmacy. This new initiative would enable the State of Texas to help its citizens and doctors make better decisions about prescription medicines.

Administrator's Statement

8/5/2016 5:09:33PM

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

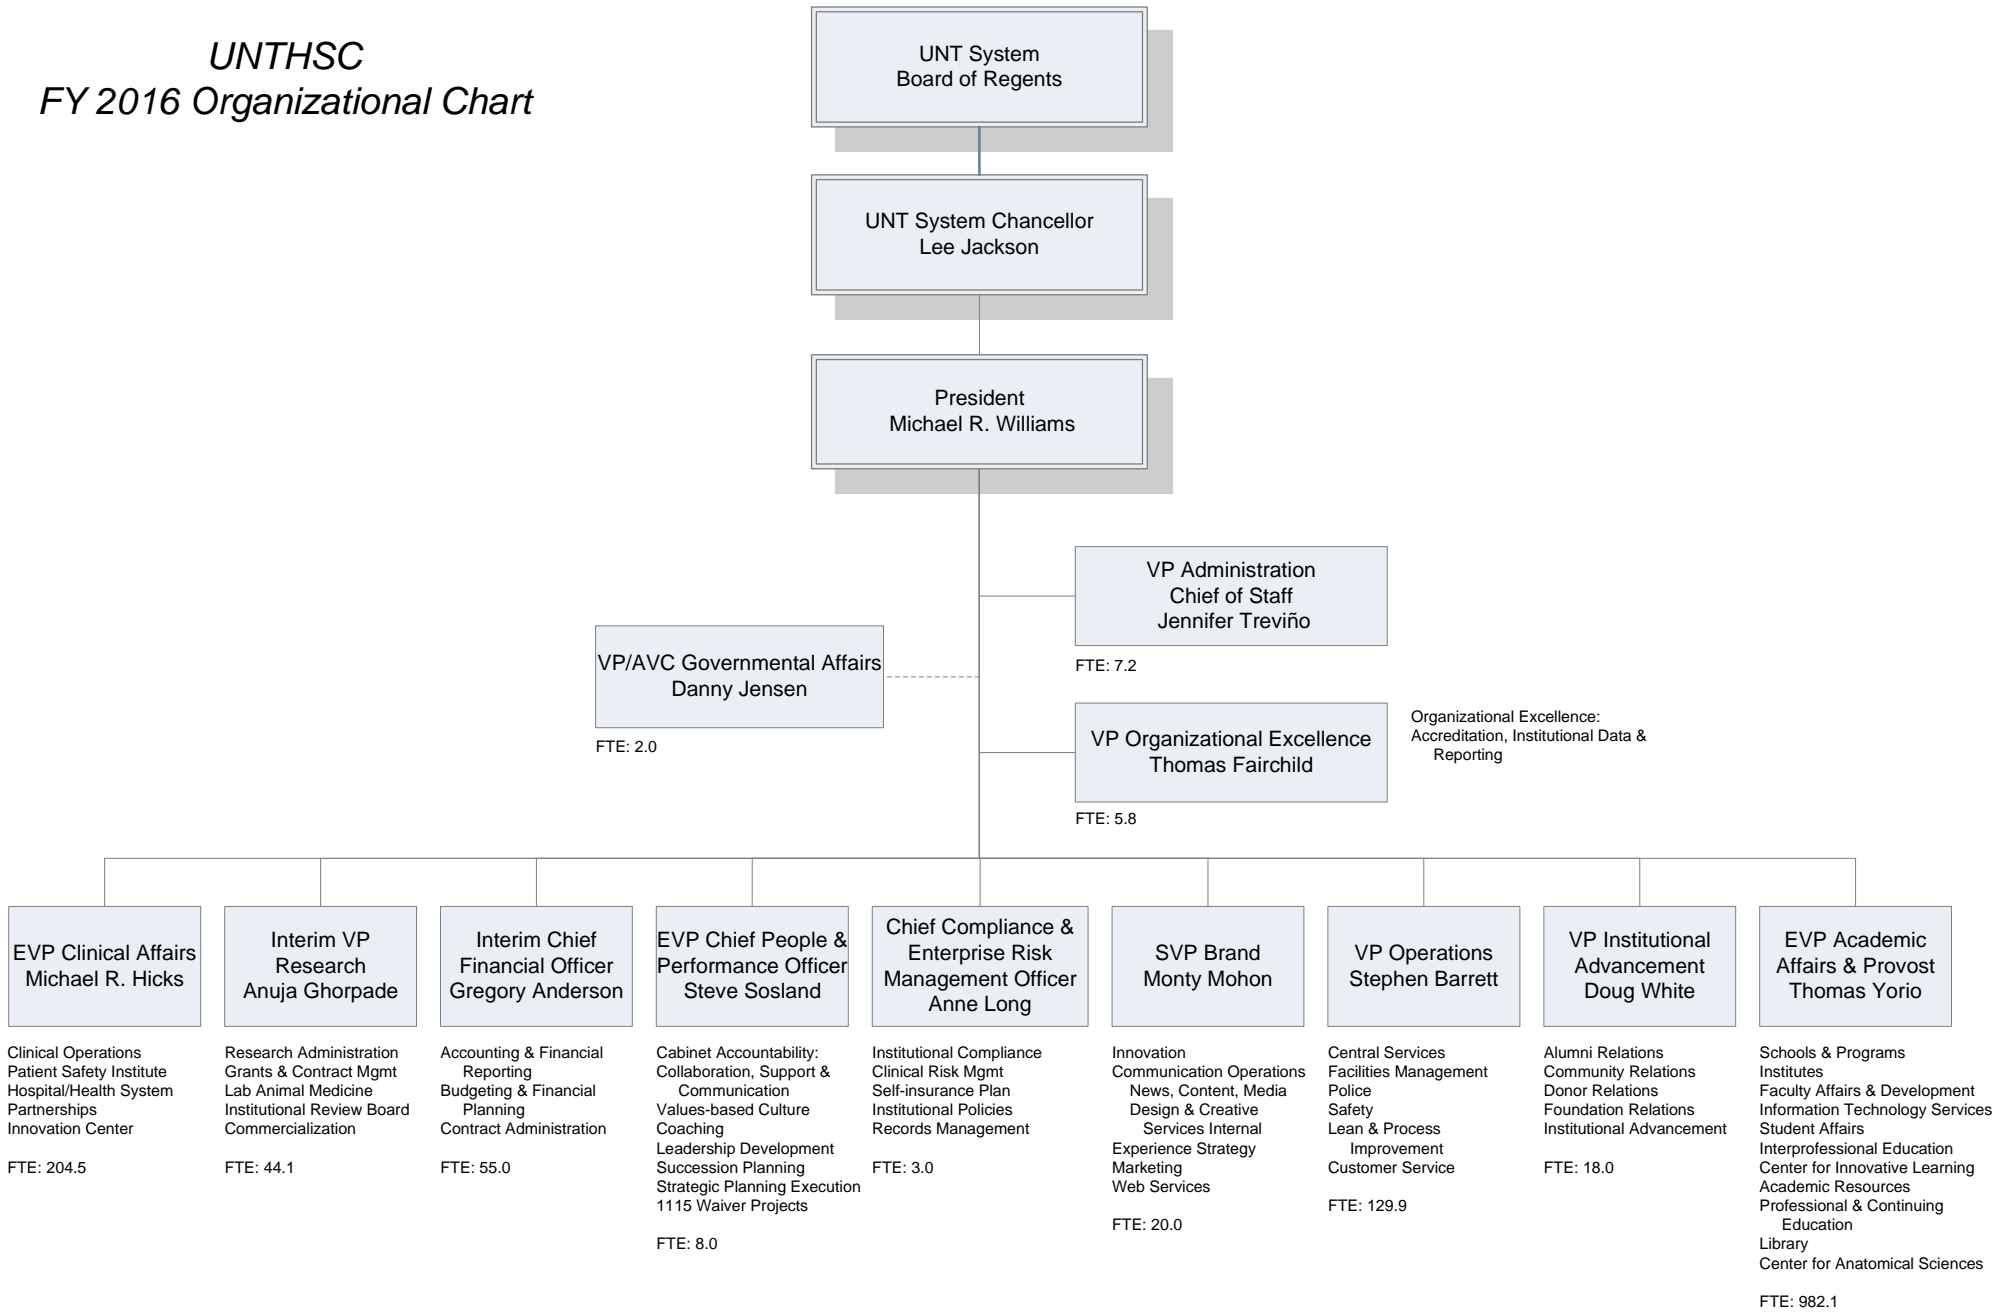

763 University of North Texas Health Science Center at Fort Worth

With the requested funds, pharmacogenetic testing would be conducted to establish optimal drug dosing and avoid adverse drug reactions. In addition, partnerships with area hospitals present opportunities for the CPM to conduct pharmacogenetic research to promote patient safety and to advance personalized medicine research.

Background Checks

UNT System's Office of Human Resources will provide background checks on all new employees, as well as student employees as allowed by the Texas Education Code, Section 51.215 and the Texas Government Code, Section 411.094.

STRATEGY DESCRIPTION AND JUSTIFICATION:

For FY 2015 only, Section 61.539 of the Texas Education Code required the 2% of the resident medical school tuition be transferred for repayment of student loans of physicians serving in designated state agencies or economically distressed or rural medically underserved areas of the State. This transfer was repealed by the 84th Legislature effective Fall 2015.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Research Enhancement formula allocates a fixed amount per year to each institution in addition to a legislatively determined percentage of the research expenditures as reported to the Texas Higher Education Coordinating Board. These funds are used to support the research activities of the institution.

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

The mission of the Alzheimer’s Diagnostic and Treatment Center is threefold: (1) to expand clinical identification, treatment and care of persons with Alzheimer’s and related memory disorders through the Geriatrics Section/Department of Internal Medicine’s Gerontology Assessment and Planning Program (GAP); (2) to facilitate basic science and translational research into the origins and treatment of Alzheimer’s; and (3) to establish productive links between Alzheimer’s work in geriatrics clinical care, pharmaceutical clinical trials, translational science, in basic science laboratories, and in public health.

UNT Health Science Center holds two NIH program project grant awards in aging and participates in several clinical trials in aging and Alzheimer’s.

In 2015, 11.7% of the Texas population was aged 65 or older, with total growth expected to reach 19.4% by year 2030. The number of people with dementia will increase with the aging of the population. Geriatrics is a Center of Excellence at UNTHSC. The institution is well-equipped to expand its work in Alzheimer’s.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

More than 250,000 Americans die annually from preventable medical errors, making medical errors the third leading cause of death in the United States. The number of Americans experiencing serious, but non-lethal, injury from preventable errors may be 10 to 20 times that number. By extrapolation, annual deaths due to medical errors in North Texas would number near 10,000. Medical errors lead to an estimated \$50 billion in added U.S. health care costs, and up to \$1 trillion in lost human potential and contributions. These alarming statistics emphasize the urgent need for patients and health care professionals to work together to eliminate medical errors and to assure the highest quality of health care for everyone in our communities. The funding of this special item supports the UNTHSC Institute for Patient Safety, which is dedicated to improving the quality and safety of health care in our region and throughout the nation. The Institute will achieve its objectives through collaborative, patient-centered, interprofessional initiatives that include comprehensive professional and community education, applied research to generate new knowledge and innovations, and quality improvement projects that directly impact health care delivery.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Application of DNA technology at the UNT Health Science Center includes forensic DNA analyses, diagnosis of Lyme disease, and the identification of missing persons and human remains. The DNA/Identity Laboratory was first funded in 1989 to support the Texas Attorney General’s Child Support Division in paternity testing. Additional funding was appropriated by the 77th Texas Legislature to establish the Lyme disease laboratory and expand genetics education. Through the Office of the Attorney General, the Texas Legislature also funded the creation of a TX Missing Persons DNA Database, which is connected to the FBI’s CODIS database. This program requires direct state funding to support the needs of Texas.

The Center for Human Identification (UNTCHI) is a statewide resource for medical examiners, Justices of the Peace, and law enforcement, providing forensic DNA casework, identification of missing persons and unidentified remains, and forensic anthropological analysis at no cost. Doctoral and professional master’s degrees with specializations in Forensic Genetics have become the primary source of education of new DNA forensic scientists and analysts for crime laboratories within Texas. The UNTCHI is an essential resource for Texas, providing critical investigative services, as well as education and training.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Missing Persons and Human Identification Program at University of North Texas Center for Human Identification (UNTCHI) provides highly-specialized forensic analyses to Texas agencies. The UNTCHI combines capabilities of a forensic anthropology lab with those of a DNA lab, creating a unique resource for the investigation of missing persons and unidentified remains, which is provided to law enforcement, Texas Rangers, Medical Examiners, Justices of the Peace, and the Texas courts at no cost to the requesting agencies. The forensic anthropology unit also supports the State’s Justices of the Peace by providing a critical basis for determinations of cause and manner of death. Moreover, UNTCHI provides expert witness testimony to support identifications and analysis of traumatic injuries should a suspect be charged in the death.

With increases in unidentified bodies near the border, a priority effort has been dedicated to assisting these overwhelmed counties. In addition to the services above, UNTCHI supports border agencies with outreach, education, and assistance to ensure thorough analyses and investigations. UNTCHI strives to expand the submission of reference samples needed to identify decedents via DNA and to provide complete dental records for future comparisons.

3.B. Rider Revisions and Additions Request

Agency Code: 763	Agency Name: University of North Texas Health Science Center at Fort Worth	Prepared By: Gail Hebert	Date: 8/05/2016	Request Level: Base
Current Rider Number	Page Number in 2016-17 GAA	Proposed Rider Language		
3.	III-196	<p>Forensic Laboratory. The University of North Texas Health Science Center at Fort Worth is authorized to conduct all blood and DNA tests associated with paternity testing for the Office of the Attorney General at a monetary rate not to exceed the monetary rate at which the Attorney General could obtain the service elsewhere to the extent permitted under federal law and regulations. The income derived from this testing is to be spent only on the Forensic Laboratory. In addition, the services of the Forensic Laboratory are available to other entities or interested parties approved by the University of North Texas Health Science Center at Fort Worth.</p> <p>No changes are needed for this Rider.</p>		
4.	III-196	<p>Parking Garage Debt Service. Funds appropriated in Strategy C.2.1, Tuition Revenue Bond Retirement, may be used to retire bonds authorized by the Seventy-sixth Legislature to construct a campus parking garage. Parking fee revenue generated by this facility will be accounted for and reported to the Legislative Budget Board. The fee revenue, minus operational and maintenance costs, will be counted in the appropriations process to offset the costs of servicing debt associated with this facility.</p> <p>No changes are needed for this Rider.</p>		

3.B. Rider Revisions and Additions Request (continued)

Agency Code: 763	Agency Name: University of North Texas Health Science Center at Fort Worth	Prepared By: Gail Hebert	Date: 8/05/2016	Request Level: Base
Current Rider Number	Page Number in 2016-17 GAA	Proposed Rider Language		
5.	III-196	<p>Estimated Appropriation and Unexpended Balance. Included in the amounts appropriated above are: (1) estimated appropriations of amounts available for distribution or investment returns out of the Permanent Endowment Fund for the University of North Texas Health Science Center at Fort Worth No. 819 and (2) estimated appropriations of the institution's estimated allocation of amounts available for distribution out of the Permanent Health Fund for Higher Education No. 810.</p> <p>a. Amounts available for distribution or investment returns in excess of the amounts estimated above are also appropriated to the institution. In the event that amounts available for distribution or investment returns are less than the amounts estimated above, this Act may not be construed as appropriating funds to make up the difference.</p> <p>b. All balances of estimated appropriations from the Permanent Endowment Fund for the University of North Texas Health Science Center at Fort Worth No. 819 and of the institution's allocation from the amounts available for distribution out of the Permanent Health Fund for Higher Education No. 810, except for any General Revenue, at the close of the fiscal year ending August 31, 2015, August 31, 2017, and the income to said fund during the fiscal years beginning September 1, 2015, September 1, 2017, are hereby appropriated. Any unexpended appropriations made above as of August 31, 2016, August 31, 2018, are hereby appropriated to the institution for the same purposes for fiscal year <u>2017-2019</u>.</p> <p>Dates have been changed to reflect new Fiscal Years.</p>		

3.B. Rider Revisions and Additions Request (continued)

Agency Code: 763	Agency Name: University of North Texas Health Science Center at Fort Worth	Prepared By: Gail Hebert	Date: 8/05/2016	Request Level: Base
Current Rider Number	Page Number in 2016-17 GAA	Proposed Rider Language		
6.	III-196	<p>Contingency Appropriations: Economic Development & Technology Commercialization. Of the amounts appropriated above in Strategy D.2.2, Economic Development & Technology Commercialization, \$3,410,000 for the University of North Texas Health Science Center is contingent upon the certification by the Comptroller of Public Accounts that the joint activities of the collaboration of the University of North Texas Health Science Center and the City of Fort Worth will generate revenue to the General Revenue Fund sufficient to offset the appropriation. The Comptroller shall specify the supporting information to be provided by the collaboration and may require independent verification of the information. If the Comptroller finds the information sufficient to support the projection of increased revenues, a finding of fact to that effect shall be issued and the contingency appropriation up to the amount certified, not to exceed \$3,410,000 for the 2016-2017 <u>2018-2019</u> biennium, shall be made available for the intended purpose.</p> <p>Dates have been changed to reflect new Fiscal Years.</p>		
7.	III-196	<p>Texas Missing Persons and Human Identification Program. Out of funds appropriated above in Strategy D.2.3, Texas Missing Persons and Human Identification Program, \$1,298,000 in General Revenue in fiscal year 2016 2018 and \$1,000,000 in General Revenue in fiscal year 2017 2019 at the University of North Texas Health Science Center at Fort Worth shall be used to support the Texas Missing Persons and Human Identification Program.</p> <p>Dates have been changed to reflect new Fiscal Years.</p>		

3.B. Rider Revisions and Additions Request (continued)

Agency Code: 763	Agency Name: University of North Texas Health Science Center at Fort Worth	Prepared By: Gail Hebert	Date: 8/05/2016	Request Level: Base
Current Rider Number	Page Number in 2016-17 GAA	Proposed Rider Language		
8.	III-197	<p>Institute for Patient Safety and Preventable Harm. Out of funds appropriated to the University of North Texas Health Science Center at Fort Worth in Strategy D.1.2, Institute for Patient Safety and Preventable Harm, \$2,000,000 in General Revenue in fiscal year 2016 2018 and \$2,000,000 in General Revenue in fiscal year 2017 2019 will be used for the Institute for Patient Safety and Preventable Harm.</p> <p>Dates have been changed to reflect new Fiscal Years.</p>

DESCRIPTION / JUSTIFICATION:

Compelling evidence now shows that genetic differences affect the risk for major fatal diseases including cancer, heart disease and dementia. Genetic variation also affects an individual's response to drugs and other therapeutic interventions. Pharmacogenetics and pharmacogenomics offer great promise for improving and personalizing health care. The FDA currently recommends genetic testing prior to establishing a safe dose for over 130 drugs. Moreover, research has shown that 38% of depression patients, 50% of arthritis patients, 40% of asthma patients, and 43% of diabetic patients will not respond to initial treatment. It is estimated that in Texas alone nine million prescriptions costing \$750 million were written for metoprolol and omeprazole in 2015. However, depending on genetic makeup, some patients may metabolize drugs poorly. As a result, Texans spend hundreds of millions of dollars on drugs that may not be suitable for them.

Fortunately, with the State's recent investment in the Institute for Patient Safety and Preventable Harm, an opportunity has arisen to develop a Center for Genome Guided Personalized Medicine (CPM) that would leverage the Institute's unique expertise, as well as combine the efforts of the UNTHSC's Institutes for Molecular Medicine and Applied Genetics and the UNT System's College of Pharmacy. This new initiative would enable the State of Texas to help its citizens and doctors make better decisions about prescription medicines.

With the requested funds, pharmacogenetic testing would be conducted to establish optimal drug dosing and avoid adverse drug reactions. In addition, partnerships with area hospitals present opportunities for the CPM to conduct pharmacogenetic research to promote patient safety and to advance personalized medicine research.

4.A. Exceptional Item Request Schedule
 85th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 8/5/2016
 TIME: 3:14:32PM

Agency code: 763

Agency name:
University of North Texas Health Science Center at Fort Worth

CODE	DESCRIPTION	Excp 2018	Excp 2019
-------------	--------------------	------------------	------------------

EXTERNAL/INTERNAL FACTORS:

Major accomplishments to date and expected over the next two years: See Justification
 Year established and funding source prior to receiving special item funding: N/A

Formula funding:None

Non-general revenue sources of funding: None

Consequences of not funding: No other similar efforts or resources exist in north Texas, and no other Health Science Center is better positioned than UNTHSC to conduct research to advance personalized medicine and develop pharmacogenetic testing in the clinic. Moreover, delayed implementation of personalized medicine in a clinical practice setting would result in increased medical errors through adverse drug reactions, as well as suboptimal health outcomes

Failure to create the CPM would be a missed opportunity to improve the medical education of the next generation of Texas physicians and pharmacists, who will need a deep understanding of pharmacogenetic principles. The research in the proposed activities would provide pharmacological insight to all UNTHSC graduates, as well as all practicing physicians.

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

It is anticipated that the level of funding provided for FY 2018 & FY 2019 at \$4,000,000 per fiscal year will remain constant throughout the out-years FY 2020 – FY 2022 in order to cover ongoing faculty and staff salaries and operating expenses. As part of the FY 2018 budget, lab equipment purchases will be necessary for the start-up of this program. While transitioning into FY 2019, research activities will begin to ramp up, necessitating the repurposing of the equipment budget in FY 2019 for reagents and annual service contracts associated with the equipment to be purchased in FY 2018. Lastly, FTEs are expected to remain flat throughout the out-years.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

2020	2021	2022
\$4,000,000	\$4,000,000	\$4,000,000

APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM : 2.00%

CONTRACT DESCRIPTION :

In FY 2018, equipment consisting of a chip reader, a DNA sequencer and a liquid handing robot are expected to be purchased. Annual service contracts for the aforementioned equipment are estimated at \$70,000 per fiscal year beginning in FY 2019 and continuing through FY 2022. This represents 2% of the total exceptional item request for each fiscal year. Due to the unique nature of the research activities, the specialized equipment required would necessitate specialized maintenance; therefore, the method of procuring the service contracts will be proprietary.

	Total Expenditures		15.7%		\$4,920,463	\$31,291,220		10.8%		\$5,170,602	\$47,875,494	

B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals

Attainment:

The University of North Texas Health Science Center (UNTHSC) attained or exceeded 2 of 5 of the applicable statewide HUB procurement goals in fiscal year 2014. UNTHSC attained or exceeded 2 of 5, of the applicable statewide HUB procurement goals in fiscal year 2015.

Applicability:

The category of Heavy Construction is not applicable to the agency's operations because we do not have programs or projects related to this field. Any spending in this category represents a miscoding during the procurement phase. This has been corrected in our processes while upgrading to PeopleSoft 9.2.

Factors Affecting Attainment:

UNTHSC makes many specialized purchases throughout the fiscal year of scientific equipment for various labs and research on campus. Professional services and other services often require specialized knowledge, skills and experience. Due to the specialization required, there are few, if any, HUB vendors in these fields. However, the agency made significant progress through this reporting period in the areas of Special Trades and Commodities.

"Good-Faith" Efforts:

The agency made the following good faith efforts to comply with statewide HUB procurement goals:

Made appropriate updates to HUB website;

Continued in-reach program meeting with departments to discuss HUB program and vendors;

Shared HUB information with campus departments in regards to HUB vendors and the goods/services they sell;

Published expenditure reports for all departments that provide detailed data by university system account number, department or administrative reporting area related to purchases made to HUB Certified Vendors, Minority Vendors and Other Vendors for all HUB procurement categories recognized by the State.

6.A. Historically Underutilized Business Supporting Schedule
85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: **8/5/2016**
Time: **3:14:33PM**

Agency Code: **763** Agency: **University of North Texas Health Science Center at Fort Worth**

Ensured contract specifications, terms, and conditions reflected the agency's actual requirements, were clearly stated, and did not impose unreasonable or unnecessary contract requirements;
Provided potential bidders with a list of certified HUBs for subcontracting.

1 Workers' Compensation Insurance - 5% Reduction

Category: Across the Board Reductions

Item Comment: Due to the limited number of strategies to which we can apply our "Targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need. Furthermore, all non-formula strategies were impacted by the 4% reduction; a further reduction would have additional adverse impacts on the services, advancements and outcomes of these significant programs.

Strategy: 1-2-2 Workers' Compensation Insurance

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

763 University of North Texas Health Science Center at Fort Worth

Authorization Date	Authorization Amount	Issuance Date	Issuance Amount	Authorized Amount Outstanding as of 08/31/2016	Proposed Issuance Date for Outstanding Authorization	Proposed Issuance Amount for Outstanding Authorization
1993	\$10,000,000	Sep 15 1994	\$10,000,000			
		<i>Subtotal</i>	\$10,000,000	\$0		
1997	\$20,000,000	Jun 15 1999	\$9,500,000			
		Sep 1 1999	\$10,500,000			
		<i>Subtotal</i>	\$20,000,000	\$0		
2001	\$27,500,000	Aug 1 2002	\$27,500,000			
		<i>Subtotal</i>	\$27,500,000	\$0		
2006	\$41,972,400	Jan 1 2009	\$41,972,400			
		<i>Subtotal</i>	\$41,972,400	\$0		
2015	\$80,000,000				Jan 5 2017	\$80,000,000

Schedule 8D: Tuition Revenue Bonds Request by Project
85th Regular Session, Agency Submission, Version 1

Agency Code: 763

Agency Name: **University of North Texas Health Science Center at Fort Worth**

Project Name	Authorization Year	Estimated Final Payment Date	Requested Amount 2018	Requested Amount 2019
Ambulatory Health Care Treatment	1993	4/15/2019	\$ 239,488.00	\$ 235,688.00
Patient Care Facility & Parking Garage	1997	4/15/2019	\$ 1,065,365.00	\$ 1,065,377.00
Ambulatory Health Care Treatment & Biotech Building	2001	4/15/2022	\$ 1,953,800.00	\$ 1,955,800.00
Public Health Education Building	2006	4/15/2028	\$ 2,888,500.00	\$ 2,889,525.00
Interdisciplinary Research Building	2015	4/15/2036	\$ 6,237,750.00	\$ 6,234,250.00
			\$ -	\$ -
			<u>\$ 12,384,903.00</u>	<u>\$ 12,380,640.00</u>

763 University of North Texas Health Science Center at Fort Worth

Special Item: 1 **Economic Development and Commercialization**

(1) Year Special Item: 2006
Original Appropriations: \$1,550,000

(2) Mission of Special Item:

The mission of Economic Development and Commercialization is to facilitate the development of Biotechnology and Translational Research at UNT Health Science Center. This funding enables the accomplishments of the goals set forth in Texas' Biotechnology Roadmap, which is to move biomedical research from bench to bedside, as well as to the community, along with the translation of new biotechnology discoveries into patents, commercial licenses, startup companies and jobs.

(3) (a) Major Accomplishments to Date:

Alliances and partnerships that have raised the level of economic growth in the Fort Worth community include:

- UNTHSC/TECH Fort Worth Community Partnership
- UNTHSC Acceleration client companies (28)
- UNTHSC Acceleration Labs (6) for incubation of life science companies and entrepreneurial support
- UNTHSC Discovery Center labs, serving an additional 12+ companies
- ZS Pharma, which raised \$112 million in an IPO (acquired by AstraZeneca for \$2.7 billion & maintains operations in North Texas)
- Cowtown Angels, a private investment network in Fort Worth
- Cx Precision Medicine, a new UNTHSC spinout company for Alzheimer's Disease
- TECH Fort Worth companies, which raised \$400+ million in direct capital (excludes ZS Pharma & economic impact multiplier)
- SBIR/STTR Partners
- Industrial Sponsored Research Programs
- Bio North Texas, a life science industry-academic network
- Texas Healthcare and Bioscience Institute, a state-wide life science organization
- Fort Worth Life Science Coalition, a life science networking series
- UNTHSC Executives-In-Residence Program
- Research Enterprise Solutions, which connects companies with university research
- FY2014-2015 results of companies/organizations benefiting from previous Special Item funding: Sales: \$22,300,000; Grants and awards from federal agencies: \$100,000; Equity Investments: \$332,500,000; Debt infusions: \$56,800,000

(3) (b) Major Accomplishments Expected During the Next 2 Years:

If funding is maintained for UNTHSC and TECH Fort Worth, then the continuing development of new life science companies can expand, including spinout companies based on UNTHSC discoveries and inventions.

The Research Enterprise Solutions Program will continue to provide resources for the Executives-In-Residence Program and generate new industry relationships with UNTHSC, as well as spurring sponsored research and product development.

763 University of North Texas Health Science Center at Fort Worth

(4) Funding Source Prior to Receiving Special Item Funding:

The Economic Development and Tech Commercialization did not receive funding until 2006.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

NA- Funding for this special item is revenue neutral per Article III-196 rider 6.

(9) Consequences of Not Funding:

The consequences of not funding this program will result in the loss of health care science and economic developments of companies and technologies that have been created over these past years, thus jeopardizing the relationships between these special partnerships and private industry.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 2 **Texas Missing Persons and Human Identification Program**

(1) Year Special Item: 2016
Original Appropriations: \$1,298,000

(2) Mission of Special Item:

The Texas Missing Persons and Human Identification Program at University of North Texas Center for Human Identification (UNTCHI) provides highly-specialized forensic analyses to Texas agencies. The UNTCHI combines capabilities of a forensic anthropology lab with those of a DNA lab, creating a unique resource for the investigation of missing persons and unidentified remains, which is provided to law enforcement, Texas Rangers, Medical Examiners, Justices of the Peace, and the Texas courts at no cost to the requesting agencies. The forensic anthropology unit also supports the State’s Justices of the Peace by providing a critical basis for determinations of cause and manner of death. Moreover, UNTCHI provides expert witness testimony to support identifications and analysis of traumatic injuries should a suspect be charged in the death.

With increases in unidentified bodies near the border, a priority effort has been dedicated to assisting these overwhelmed counties. In addition to the services above, UNTCHI supports border agencies with outreach, education, and assistance to ensure thorough analyses and investigations. UNTCHI strives to expand the submission of reference samples needed to identify decedents via DNA and to provide complete dental records for future comparisons.

(3) (a) Major Accomplishments to Date:

UNTCHI is the single largest contributor of DNA profiles to the Federal CODIS database, which houses information on missing and unidentified remains. Since its inception in 2003, over 1,975 identifications have been made, of which a good portion has served the needs of Texas. . Since 2010, the Laboratory of Forensic Anthropology has assisted law enforcement in 118 Texas Counties with skeletal remains location, recovery, and analysis. In 2015 alone, UNTCHI has provided anthropological assistance to agencies in the defined border region, resulting in the analysis of 70 skeletal remains cases. Corresponding DNA analysis of unidentified remains from the border region in 2015 included the submission of samples from 116 unidentified remains and have resulted in 25 associations leading to identifications of missing persons. This assistance is particularly important to counties proximal to the border with immediate and urgent needs to identify human remains and missing persons, as well as require essential death investigation information. These border counties often are insufficiently funded to perform these activities.

Assistance also has been provided to the Texas Forensic Science Commission in its efforts to ensure that best practices for border death investigations are developed.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

UNTCHI will continue to provide timely and specialized forensic services to law enforcement, medical examiners, Justices of the Peace, and the courts throughout Texas. The UNTCHI works closely with the Texas Rangers to provide services to rural Texas Counties which may not be aware of the resources that are available. Working with agencies in the defined border region, as well as all of Texas, to analyze and identify victims of migration, violent crime, and drug trafficking will continue to be a priority.

Following agreements with Consulate offices in Texas, the number of submissions of DNA reference samples related to individuals missing along the border is expected to increase, necessitating UNTCHI's increased assistance to facilitate the direct submission of samples.

Working with the Forensic Science Commission, UNTCHI hopes to compare the DNA profiles developed from unidentified remains in Texas to a large collection of reference samples collected and maintained by a non-governmental, non-CODIS humanitarian organization. Furthermore, UNTCHI will continue to work with the Forensic Science Commission to develop best practices required to effectively investigate deaths along the Texas border, reunite families of the missing with their loved ones, and support law enforcement and the judicial system.

(4) Funding Source Prior to Receiving Special Item Funding:

Supplemental funding for the Missing Persons DNA Program and funding for the Laboratory of Forensic Anthropology has in the past been provided by soft money grants from the National Institute of Justice.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Supplemental funding for the Missing Persons DNA Program and funding for the Laboratory of Forensic Anthropology has in the past been provided by soft money grants from the National Institute of Justice.

(9) Consequences of Not Funding:

With ongoing reductions in Federal grant funding for missing persons investigations and no anticipation of restoration of such funds, these Legislative funds are critical for the continuation of the work that UNTCHI provides to Texas law enforcement, medicolegal entities, the courts, and the citizens of Texas. Texas is the leader in the analysis and resolution of missing persons cases and unidentified remains and a pioneer in providing these services to investigative agencies who would otherwise not have the resources to access them. Without the State's ongoing funding, UNTCHI would not be able to support the initiatives described above, and Texas would be without this essential capability.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 3 **DNA Laboratory**

(1) Year Special Item: 2000
Original Appropriations: \$217,428

(2) Mission of Special Item:

Application of DNA technology at the UNT Health Science Center includes forensic DNA analyses, diagnosis of Lyme disease, and the identification of missing persons and human remains. The DNA/Identity Laboratory was first funded in 1989 to support the Texas Attorney General's Child Support Division in paternity testing. Additional funding was appropriated by the 77th Texas Legislature to establish the Lyme disease laboratory and expand genetics education. Through the Office of the Attorney General, the Texas Legislature also funded the creation of a TX Missing Persons DNA Database, which is connected to the FBI's CODIS database. This program requires direct state funding to support the needs of Texas.

The Center for Human Identification (UNTCHI) is a statewide resource for medical examiners, Justices of the Peace, and law enforcement, providing forensic DNA casework, identification of missing persons and unidentified remains, and forensic anthropological analysis at no cost. Doctoral and professional master's degrees with specializations in Forensic Genetics have become the primary source of education of new DNA forensic scientists and analysts for crime laboratories within Texas. The UNTCHI is an essential resource for Texas, providing critical investigative services, as well as education and training.

(3) (a) Major Accomplishments to Date:

The UNTCHI Missing Persons DNA Database and Laboratory of Forensic Anthropology work in collaboration with the Texas Department of Public Safety. UNTCHI is the single largest contributor of DNA profiles to the Federal CODIS database, which houses information on missing and unidentified remains. Since its inception in 2003, over 1,975 identifications have been made, of which a good portion has served the needs of Texas. In 2015, 313 associations were made that lead to the identification of human remains, many of whom were murder victims. Additionally, the Forensic DNA Laboratory of UNTCHI analyzed 1,520 cases that supported Texas criminal investigations. Furthermore, analysts from UNTCHI laboratories routinely provide expert testimony for Texas courts at no cost. Funding to process these cases came from money provided by the State of Texas and the National Institute of Justice.

UNTCHI has supported the Texas Forensic Science Commission by addressing the proper interpretation of DNA mixture evidence and providing guidance and testimony for both prosecution and defense. Over 150 mixture cases from forensic labs in Texas have been reviewed by UNTCHI.

The Department of State Health Services Zoonosis Control Program has partnered with the UNTHSC Tick-Borne Disease Research Lab for the analysis of ticks attached to humans for pathogenic disease agents.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

UNTCHI will continue to analyze and identify a significant number of unidentified human decedents that are found throughout the State of Texas, with an additional focus on deaths in counties located near the Texas-Mexican Border. Many of these identifications will be the result of a violent crime, and, in a number of these cases, the identification of the remains will lead to the apprehension and conviction of the true perpetrator of the murder.

We continue to receive Federal Backlog funds from the National Institute of Justice through the Texas Department of Public Safety to provide DNA testing for law enforcement agencies throughout the DFW Metroplex and the State of Texas. This testing will result in a significant number of CODIS matches that are expected to conclude in identification of the victims and convictions of the perpetrators.

Major research and development of advanced methods of human identification from the Forensic Genetics Research Laboratory, such as next generation sequencing, will ensure that UNTCHI is a state-of-the-art facility and a nationally and internationally recognized leader in forensic genetics.

Support of the Texas Forensic Science Commission will continue to address problems in DNA mixture interpretation, laboratory protocols, quality assurance, certification, and border deaths.

(4) Funding Source Prior to Receiving Special Item Funding:

The UNTHCHI DNA/Identity Laboratory and Anthropology Laboratory were not funded prior to receiving special item funding for FY's 2000 & 2001.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

The DNA/Identity Laboratory has been funded from appropriated General Revenue since FY's 2000 & 2001. The UNT Center for Human Identification currently receives support from both the Texas Legislature, through the Department of Public Safety and National Institute of Justice, to supply both DNA and anthropological analyses of human skeletal remains, as well as traditional forensic casework analyses. Currently the State does not provide any legislative support for the forensic casework that UNTCHI provides to law enforcement agencies and prosecutorial agencies performed within Texas; rather, funding is provided from Federal Backlog grants.

(9) Consequences of Not Funding:

763 University of North Texas Health Science Center at Fort Worth

The Legislature established the TX Missing Persons DNA Database in 2001 on the UNTHSC campus with funding provided by the Attorney General's Crime Victims' Compensation Fund, and UNTCHI began accepting samples from Texas law enforcement agencies in March 2003. Texas was the first state in the country with a Missing Persons DNA Database capable of analyzing both Mitochondrial and STR systems and is the first state to participate in the FBI's federal database for missing persons. The database provides a very powerful tool for investigators who are trying to locate missing persons or identify remains by allowing federal, state, and local crime laboratories to electronically exchange and compare DNA profiles. The DNA analyses and forensic anthropological examinations of human remains are provided by the UNTCHI at no charge to law enforcement agencies, medicolegal entities, or those with missing family members.

The UNTCHI has provided scientific and technical support for Texas law enforcement and crime labs for more than 13 years. UNTHSC's renowned faculty, DNA analysts, and forensic anthropologists serve as experts for the Attorney General's Office and District Attorney's offices throughout the State. Without ongoing funding, UNTHSC's UNTCHI would not be able to support the initiatives described above.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 4 **Institute for Patient Safety and Preventable Harm**

(1) Year Special Item: 2016
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

More than 250,000 Americans die annually from preventable medical errors, making medical errors the third leading cause of death in the United States. The number of Americans experiencing serious, but non-lethal, injury from preventable errors may be 10 to 20 times that number. By extrapolation, annual deaths due to medical errors in North Texas would number near 10,000. Medical errors lead to an estimated \$50 billion in added U.S. health care costs, and up to \$1 trillion in lost human potential and contributions. These alarming statistics emphasize the urgent need for patients and health care professionals to work together to eliminate medical errors and to assure the highest quality of health care for everyone in our communities. The funding of this special item supports the UNTHSC Institute for Patient Safety, which is dedicated to improving the quality and safety of health care in our region and throughout the nation. The Institute will achieve its objectives through collaborative, patient-centered, interprofessional initiatives that include comprehensive professional and community education, applied research to generate new knowledge and innovations, and quality improvement projects that directly impact health care delivery.

(3) (a) Major Accomplishments to Date:

1. Conducted in-depth, region-wide interviews and group meetings of stakeholders including academic institutions, health care systems, providers, and patients to understand the pressing patient safety needs of the community
2. Finalized Institute strategic plan, including vision, mission, goals, and specific strategies for implementation
3. Formally established the Institute with four founding institutional members: UNTHSC, TCU, JPS, and Cook Children's
4. Engaged broad community support: currently the Institute has 41 fellows representing 7 regional Texas institutions
5. Established Institute board with representation from multiple regional institutions as well as patient advocates
6. Established a student chapter of the Institute for Health Care Improvement with >50 student members
7. Hosted two national level Patient Safety Summits attended by hundreds of health care providers, leaders, and patient advocates from throughout the State of Texas
8. Established and funded multi-institutional seed grants and project grants that will directly impact patient safety primarily in the ambulatory setting
9. Established faculty scholars program to enable talented faculty to develop and implement novel programs that directly impact patient safety

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

1. Conduct research and implement solutions that will measurably improve patient safety in the areas of geriatrics, ambulatory care, narcotic addiction and weaning, joint replacement, and other critical areas
2. Implement a shared, community-wide Institutional Review Board (IRB) to facilitate research in patient safety
3. Develop and implement interprofessional curriculum in patient safety and quality for medical, nursing, public health, pharmacy, business, health policy, engineering, and other professional students
4. Implement and offer multiple continuing education courses in patient safety that can be accessed throughout Texas
5. Implement and offer specific training in patient safety for Hospital Board Members throughout Texas
6. Develop and implement novel public-private partnerships, including one focused on improving quality and safety for cancer patients, through the establishment of novel care paradigms with interprofessional teams
7. Establish innovative partnerships with corporate partners in order to further establish and scale patient safety solutions
8. Host and expand 3rd Annual national level Patient Safety Summit

(4) Funding Source Prior to Receiving Special Item Funding:

N/A

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

N/A

(9) Consequences of Not Funding:

Significant improvements in patient safety are achievable by fully-leveraging our resources and establishing a ubiquitous and transparent culture of patient safety throughout our region. Within a single year, the Institute has already garnered a national reputation and has implemented novel interdisciplinary programs that will impact safety and quality in our region. Without state funding, the Institute will have no resources to test and implement new programs, processes, and technologies that will decrease the unacceptable high mortality and suffering caused by medical errors and poor quality.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 5 **ALZHEIMER'S DIAGNOSTIC & TREATMENT CENTER**

(1) Year Special Item: 2002
Original Appropriations: \$500,000

(2) Mission of Special Item:

The mission of the Alzheimer's Diagnostic and Treatment Center is threefold: (1) to expand clinical identification, treatment and care of persons with Alzheimer's and related memory disorders through the Institute for Healthy Aging, Center for Geriatrics - Geriatric Assessment and Planning Program (GAP); (2) to facilitate basic science and translational research into the origins and treatment of Alzheimer's; and (3) to establish productive links between Alzheimer's work in geriatrics clinical care, pharmaceutical clinical trials, translational science, in basic science laboratories, and in public health.

UNT Health Science Center holds two NIH program project grant awards in aging and participates in several clinical trials in aging and Alzheimer's.

In 2015, 11.7% of the Texas population was aged 65 or older, with total growth expected to reach 19.4% by year 2030. The number of people with dementia will increase with the aging of the population. Geriatrics is a Center of Excellence at UNTHSC. The institution is well-equipped to expand its work in Alzheimer's.

(3) (a) Major Accomplishments to Date:

Formation of the Institute for Healthy Aging, comprised of three (3) integrated centers: Center for Geriatrics (CG), Center for Alzheimer's & Neurodegenerative Disease Research (CANDR) and the Center for Neuroscience Discovery (CND).

Center for Geriatrics is a leader in providing clinical care to the older adults of North Texas. The Center's accomplishments include:

- Integrated Geropsychiatry and Geriatrics Neuropsychology's "Memory Disorders" Program and Neurology
- Expanded interprofessional clinical services, student education and clinical research through the successful recruitment of physicians (MD/DO), nurse practitioners, clinical social workers, pharmacist, physical therapist, dietitian and psychologist
- Awarded \$2.6 million Health Resources and Administration (HRSA) grant for Geriatric Workforce Enhancement Program (GWEP) over 3 years, which supports the program Workforce Enhancement Healthy Aging and Independent Living (WE HAIL)

Center for Alzheimer's and Neurodegenerative Disease (CANDR) accomplishments include:

- Development of a Translational Science Team for Alzheimer's Disease and Age Related Problems
- Participated in the Texas Alzheimer's Research and Care Consortium (TARCC)
- Integrated the Translational Aging and Alzheimer's Team, which established the HABLE (Healthy Aging Brain in Latino Elders) program

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

Center for Geriatrics will actively pursue grant funding opportunities related to the patient safety (of the older adult) in various care settings (outpatient, long term care and home) and will continue to seek and review opportunities to expand relationships within the community to enhance Geriatric education and clinical services provided.

The translational research team will work with the well-established GAP clinic to increase the enrollment of older adults into research studies that may include pharmaceutical clinical trials and collaborate with the basic and public health scientists. The research team will focus on early detection of Alzheimer's, estrogen's role in Alzheimer's and Parkinson's, stroke therapy and identification of oxidation processes to measure brain aging.

The amount of research conducted from bench to bedside will be increased. Currently, several drugs are in clinical trials for the treatment of Alzheimer's disease, Parkinson's disease and stroke. Furthermore, partnerships with private-sector biotechnology and pharmaceutical companies in the development of treatments for neurological disorders will continue, along with participation in pharmaceutical clinical trials with faculty from the new UNTSystem College of Pharmacy.

(4) Funding Source Prior to Receiving Special Item Funding:

The Alzheimer's Diagnostic and Treatment Center was not funded prior to receiving special item funding for FY 2002 & 2003.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

The Alzheimer's Diagnostic and Treatment Center has been funded from appropriated General Revenue since FY 2002 & 2003.

(9) Consequences of Not Funding:

Not funding this program will reduce the Center for Geriatrics ability to reach and impact the education and training of future health care professionals (multiple disciplines) in the care and treatment of the older adult, thus reducing the ability for Texas to provide age-appropriate care to this rapidly growing population. The Institute for Aging and Alzheimer's Disease Research (IAADR) has focused on early detection of Alzheimer's, as well as estrogen's role in Alzheimer's and Parkinson's; stroke therapy; and identification of oxidation processes to measure brain aging. Furthermore, the IAADR is leading the development of preclinical trials in Aging and Alzheimer's Disease. However, without ongoing funding, the UNT Health Science Center would not be able to support these initiatives.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 6 **INSTITUTIONAL ENHANCEMENT**

(1) Year Special Item: 2000
Original Appropriations: \$1,000,000

(2) Mission of Special Item:

Institutional Enhancement funds are used for salary support throughout the UNT Health Science Center to help support the growth in medical education, research, and public health.

(3) (a) Major Accomplishments to Date:

Core institutional functions have been preserved with these funds.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continue to help preserve core institutional functions

(4) Funding Source Prior to Receiving Special Item Funding:

Institutional Enhancement was not funded prior to receiving special item funding in FY 2002.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

N/A

(9) Consequences of Not Funding:

Since General Revenue plays a significant role in financing the core operations of our institution, it is important that it be maintained and not reduced. The consequences of not funding Institutional Enhancement would result in the loss of key faculty positions in our medical school, graduate school of biomedical sciences, school of public health, and school of health professions.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 7 **Center for Genome Guided Personalized Medicine**

(1) Year Special Item: 2018
Original Appropriations: \$4,000,000

(2) Mission of Special Item:

Compelling evidence now shows that genetic differences affect the risk for major fatal diseases including cancer, heart disease and dementia. Genetic variation also affects an individual's response to drugs and other therapeutic interventions. Pharmacogenetics and pharmacogenomics offer great promise for improving and personalizing health care. The FDA currently recommends genetic testing prior to establishing a safe dose for over 130 drugs. Moreover, research has shown that 38% of depression patients, 50% of arthritis patients, 40% of asthma patients, and 43% of diabetic patients will not respond to initial treatment. It is estimated that in Texas alone nine million prescriptions costing \$750 million were written for metoprolol and omeprazole in 2015. However, depending on genetic makeup, some patients may metabolize drugs poorly. As a result, Texans spend hundreds of millions of dollars on drugs that may not be suitable for them.

With the requested funds, pharmacogenetic testing would be conducted to establish optimal drug dosing and avoid adverse drug reactions. In addition, partnerships with area hospitals present opportunities for the CPM to conduct pharmacogenetic research to promote patient safety and to advance personalized medicine research.

(3) (a) Major Accomplishments to Date:

N/A

(3) (b) Major Accomplishments Expected During the Next 2 Years:

See Mission Statement

(4) Funding Source Prior to Receiving Special Item Funding:

N/A

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

N/A

763 University of North Texas Health Science Center at Fort Worth

(9) Consequences of Not Funding:

No other similar efforts or resources exist in north Texas, and no other Health Science Center is better positioned than UNTHSC to conduct research to advance personalized medicine and develop pharmacogenetic testing in the clinic. Moreover, delayed implementation of personalized medicine in a clinical practice setting would result in increased medical errors through adverse drug reactions, as well as suboptimal health outcomes

Failure to create the CPM would be a missed opportunity to improve the medical education of the next generation of Texas physicians and pharmacists, who will need a deep understanding of pharmacogenetic principles. The research in the proposed activities would provide pharmacological insight to all UNTHSC graduates, as well as all practicing physicians.
